

**SMART CITY (smart city)** - a modern management model based on advanced knowledge and the introduction of modern information and communication technologies for creation of a comfortable environment;

- improving the quality of services, transparency and openness of power, partnership with business;
- activation of citizens' participation in the development of Ukrainian cities and the formation of a new policy;
- an incentive for the development of public initiatives and business projects;
- using of modern geographic information and information systems to provide access to municipal, regional data;
- increasing the indicators in the ratings, and not for each figure;
- quality of life of every citizen;
- successful reforming and increasing of the competitiveness of the country as a whole due to the integrated implementation of information and communication technologies in every sphere of life of each city;
- formation of a new type of state, oriented to meet the needs of citizens.

The model of a modern city should develop in full harmony with the environment. Therefore, the Ecosystem is a key issue in the subject matter of this Forum.

## PURPOSE AND OBJECTIVES:

An active dialog of all sides of civil society is necessary condition for its development. Particular attention of communication, communication of horizontal ties acquire in the process of decentralization. A perfect community, a city are impossible without an effective dialogue, experience exchange, the introduction of best practices. Therefore, the creation of a communication platform for solving economic issues of the communities will greatly contribute for accelerating this process, increasing its efficiency and also developing a responsible attitude towards the environment.

The Forum's task is to unite the potential of its participants precisely at solving the key problems posed by everyone, and each separately, the modern world. A world in which everything is changing very rapidly, new challenges arise promptly, it is need to make quick, an effective and professional decisions.

We are inviting to this site all those who:

- *knows* what to do;
- *can* do;
- *already doing*;
- *does not need* to be controlled;
- *needs* dialogue with experts, communication with colleagues.
